

Intelligent Network Exposure Assessment Tool (INEAT)

Target	127.0.0.1
Open Ports	135, 445, 3306, 5040, 5985, 8501
Exposure Score	60/100
Overall Risk	HIGH
Security Grade	C

Open Ports Summary

Port	Service	Protocol	Category	Risk
135	epmap	TCP	Windows Services	MEDIUM
445	microsoft-ds	TCP	Windows Services	HIGH
3306	mysql	TCP	Database	HIGH
5040	Unknown	TCP	Unknown	Unknown
5985	wsman	TCP	Web Services	LOW
8501	cmtp-mgt	TCP	General Services	LOW

Port Details

Port 135

Service	epmap
Protocol	TCP
Category	Windows Services
Risk	MEDIUM
Description	DCE endpoint resolution

Recommendations

- Disable legacy protocols
- Restrict internal access
- Apply latest Microsoft security updates.

Port 445

Service	microsoft-ds
---------	--------------

Protocol	TCP
Category	Windows Services
Risk	HIGH
Description	Microsoft-DS

Recommendations

- Disable legacy protocols
- Restrict internal access
- Apply latest Microsoft security updates.

Port 3306

Service	mysql
Protocol	TCP
Category	Database
Risk	HIGH
Description	MySQL

Recommendations

- Restrict database access
- Disable public exposure
- Enable encryption
- Use strong authentication.

Port 5040

Service	Unknown
Protocol	TCP
Category	Unknown
Risk	Unknown
Description	No Description

Recommendations

- No Recommendation

Port 5985

Service	wsman
Protocol	TCP

Category	Web Services
Risk	LOW
Description	WBEM WS-Management HTTP

Recommendations

- Enable HTTPS
- Keep web server updated
- Use a Web Application Firewall (WAF).

Port 8501

Service	cmtmp-mgt
Protocol	TCP
Category	General Services
Risk	LOW
Description	CYTEL Message Transfer Management

Recommendations

- Review service configuration
- Disable if unused
- Apply security patches regularly.

Security Summary

Overall Exposure Score: 60/100

Overall Risk Level: HIGH

Security Grade: C

Total Open Ports: 6

This report was generated by the **Intelligent Network Exposure Assessment Tool (INEAT)**. Review all HIGH and CRITICAL risk services immediately. Close unnecessary ports and keep all exposed services updated.
